

Patient-Facing Telehealth Solutions

Healthcare organizations worldwide use Ergotron products in telehealth applications to enable real-time telepresence and expand their geographic service area and offerings.

Our aim is to design products that help caregivers thrive. We're also helping caregivers provide more efficient and frequent care to support increased patient compliance and fewer readmissions.

Full-featured mobile diagnostic cart

- Easily moves to patients and adapts to fast-moving care areas, like emergency departments
- Works as a central hub for multiple telehealth diagnostic devices, helping caregivers instantly adapt to a wide variety of medical situations
